I am a Motivated Undergraduate with a strong interest in Frontend web development and building modern, user-friendly applications. Experienced in academic and team projects, I have passion for coding, UI/UX design and problem solving. Eager to grow and contribute in a dynamic, forward-thinking environment while developing efficient and scalable solutions.

Skills

- **Technical skills** – HTML | CSS | Java | JS | MySQL | C++ | Tailwind CSS | React | WordPress | Git & GitHub
- **Soft skills** – Team collaboration, communication, problem-solving, time management, attention to detail, leadership, adaptability.
- **Language skills** – Sinhala – Native | English- Intermediate

Projects

- **E- Commerce web site – (WordPress- Ongoing)**
 - Developing a responsive e-commerce website using WordPress and WooCommerce.
 - Implementing shopping cart, product management and checkout functionality.
 - Customizing themes and optimizing UI/UX and website performance.
- **Coffee Cup (ReactJS, Tailwind CSS, MySQL – Own Project, Ongoing)- ([GitHub Repository](#))**
 - Built a responsive coffee shop website using Tailwind CSS and MySQL.
 - Developed interface UI components for menu, cart and use navigation.
 - Integrate MySQL database for product management and order processing.
- **Smart City Information Portal (React, Next.js, Tailwind CSS, AI) - ([GitHub Repository](#))**
 - Built a responsive web app using React, Next.js and Tailwind CSS.
 - Designed dynamic and reusable UI components.
 - Improved performance and user experience.
- **Smart Home Security System (C++) - ([GitHub Repository](#))**
 - Developed an IOT-based home automation system using C++.
 - Implemented security, device control and energy monitoring features.
 - Enhanced system efficiency through real-time data processing.
- **Pre-School Management system (Java, MongoDB) – ([GitHub Repository](#))**
 - Developed a system using Java, MongoDB.
 - Implemented student management and attendance tracking.
 - Improve usability with clean interface and organized workflows.
- **Hotel management system (HTML, CSS, JavaScript) – ([GitHub Repository](#))**
 - Built a responsive web interface using HTML,CSS and JavaScript.
 - Developed features for room booking , reservation management and billing system.
 - Optimized workflow for efficient hotel operations management.

Education

- **General Sir John Kotelawela Defence University | Bachelor of Information and communication technology**
(March 2024 – Present)
- **IMBS Green University | Diploma In English |**
 - Grade: Distinction Pass
- **MO Wellassa National School | G.C.E. Advance Level | 2020 – 2023**
 - Grades: Engineering Technology – C, Science for Technology – C, Information & Communication Technology -C
 - District Rank: 50
- **MO Mahamathya Science College | G.C.E Ordinary Level Examination | 2019**
 - Grades: Mathematics - C, Science - C, Business & account- C, Sinhala – B, English – B, History – A, Buddhism – A, Music- B, Information and Communication Technology - B

Certifications

- Postman API Fundamentals Student Expert
- Front-End web development (University of Moratuwa)
- Oracle Cloude Infrastructure foundation Associate 2025
